

Curriculum vitae of Prof. Antonio Lioy

Antonio Lioy holds a “laurea” (a.k.a. M.Sc.) in Electronic Engineering *summa cum laude*, and a Ph.D. in Computer Engineering, both from Politecnico di Torino, Italy.

He is currently Full Professor of Computer Engineering at the Dipartimento di Automatica e Informatica (i.e. Department of Computer and Control Engineering) of the Politecnico di Torino where he is in charge of the courses “Computer systems security” and “Design of web systems and computer networks”.

Initially the research interests of Professor Lioy were in the field of computer-aided design and test of digital circuits, where he achieved important results in the areas of fault collapsing and automatic test generation, and participated in several research projects funded by the European Commission (EC), SGS-Thomson, and DEC.

Since 1994 these interests have moved to the field of computer and network security, with special emphasis on PKI, e-identity, network and application security, and policy-based and ontology-based design of the protection for large information systems.

Prof. Lioy leads the TORSEC research group which performs research and consultancy projects in the field of network and computer security, for both public agencies and private companies. This group took or is taking part to several projects, including the following ones:

- ICE-TEL (1996-98) and ICE-CAR (1999-2000, both funded by EC/DG-XIII), to setup the first experimental European public-key infrastructure based on X.509 certificates and to develop related security applications (such as digital signature, secure web and secure e-mail).
- DISTINCT (1998-99, EC/DG-XIII) for the deployment of Internet-based services offered by public administrations to citizens, with mobility and security provided by smart-cards.
- GUIDES (1999, EC/DG-XIII) for the development of guidelines towards setting up a certification authority for a public administration.
- AIDA (2000-2001, EC/DG-XIII) for the development of a secure e-government infrastructure and a portable digital signature device WYSIWYS (What You See Is What You Sign).
- TESI (2000-2003, EC/Eureka-ITEA) for the development of an European-controlled computer and network security framework.
- NASTEC (2001-2002, EC/DG-INFOSOC) for the deployment of a security infrastructure into the EC’s Newly Associated Countries in Eastern Europe.
- POSITIF (2004-2007, EC/DG-INFOSOC, IST FP6) to develop a security architecture based on formal policies, with the related tools for automatic system configuration and management; **Prof. Lioy was the Coordinator and main proposer of this project** (11 partners, 2.5 million Euro total funding).
- Open_TC (2005-2009, EC/DG-INFOSOC, IST FP6) to develop an “open” Trusted Computing system based on Linux; Prof. Lioy was in the Steering Board of this project.
- Deserec (2006-2008, EC/DG-INFOSOC, IST FP6) to develop methodologies and tools to increase the dependability of a complex networked information system, as part of a Critical Infrastructure Protection plan; **Prof. Lioy was the Scientific Manager of this project**.
- OPEN-GATE (2006-2010) Italian project for the development of a secure telematic platform for automotive applications.
- MEADOW (2006-2010) Italian project for the development of a secure and robust wireless platform for home applications (automation and entertainment).

- Stork (2008-2011, EC, ICT-PSP) to create a European interoperability platform for electronic identification systems and to develop digital cross-border services based on the European e-IDs; Prof. Liroy was a member of the Executive Committee of this project and represented Italy in its Member States Council.
- TCCLOUDS (2010-2013, EC/DG-INFOSOC, IST FP7) for the definition of an architecture and tools to create trusted cloud computing environments;
- POSECCO (2010-2013, EC/DG-INFOSOC, IST FP7) to develop methodologies and tools for policy-based security configuration creation, analysis, and audit; Prof. Liroy is in the Steering Board of this project.
- WEBINOS (2010-2013, EC/DG-INFOSOC, IST FP7) for the development of a web-based open and secure framework for mobile applications usable across different personal devices (e.g. smartphone, smart-TV, car infosystems).
- Stork 2.0 (2012-2015, EC, ICT-PSP) for extending the e-ID interoperability framework of Stork to legal persons, business roles, and more general personal attributes; prof. Liroy represents Italy in the Member States Council of this project.
- e-SENS (2013-2016, EC, ICT-PSP) to consolidate the results of previous European Large Scale Pilot projects and create common building-blocks for the European Interoperability Architecture; in this project Prof. Liroy leads the workpackage related to e-ID, security and trust.
- ASPIRE (2013-2016, EC/DG-CONNECT, IST FP7) to design and test advanced techniques for software-based protection of consumer devices and digital contents; Prof. Liroy is in the Steering Board of this project.
- SECURED (2013-2016, EC/DG-CONNECT, IST FP7) to design and test an innovative architecture to offload security functions from personal devices into the network; **Prof. Liroy is the Coordinator of this project** (7 partners, 2.7 million Euro total funding).
- CLIPS (2014-2016, EC, ICT-PSP) for creating and experimenting a cloud-based architecture to offer public services, with enhanced features with respect to service composition, security and identity management.
- SDIM (2014, EIT ICT labs) to design a secure digital identity ecosystem for mobile electronic devices.
- FIDES (2015, EIT ICT labs) to design a privacy-preserving federated identity management system building on the results of relevant European initiatives, such as Stork, FutureID, and SDIM.
- FICEP (2016-2019, CEF Telecom) to integrate the Italian electronic identity architecture SPID into the European eIDAS framework; **Prof. Liroy is the technical Coordinator of this project** (4 partners, 0.6 million Euro total funding).
- SHIELD (2016-2019, EC/DG-CONNECT, H2020) to design and test a secure and trusted advanced network infrastructure based on SDN (Software-Defined Networking) and NFV (Network Function Virtualization).
- eID4U (2018-2019, CEF Telecom) to design and test an electronic identity schema for application to the academic domain **Prof. Liroy is the Coordinator of this project** (5 partners, 0.6 million Euro total funding).
- HEALTHeID (2018-2019, CEF Telecom) to design and test an electronic identity schema for application to the healthcare domain.
- DeepAugur (2018, EIT ICT labs) to design and test a big data analytics framework to detect cybersecurity threats.

Prof. Lioy is author of more than 100 scientific and technical papers, and he is a registered Professional Engineer in Italy, a member of the IEEE and the IEEE Computer Society.

For his specific knowledge in the field of computer security, he was a member of the technical committees that supervised the deployment of digital signature and electronic documents within the network of CNR (the Italian National Research Council) and the Cities of Asti, Bologna, Modena, Moncalieri, Rome and the Province of Macerata.

In the years 1997-2006 years Prof. Lioy led the execution of the consultancy contract between the Politecnico di Torino and the Italian Department of Justice, related to various topics in network and application security.

From 1998 to 2002 Prof. Lioy was a member of the OTS-GARR (i.e. the steering group for the Italian research network).

Since June 1999 he is a reviewer for the European Commission (EC) for research projects in the trust and security area; this involves proposal evaluation and execution monitoring of funded projects. With reference to this last point, Prof. Lioy was a reviewer of the following projects: TIE (2000-2001), PKIchallenge (2002-2003), LaMer (2002-2003), EISPP (2002-2004), SMART_MEIJI (2004), Mosquito (2005-2006), SERSCIS (2010-2013), ECRN (2010), EMILI (2011-2013), STANCE (2013-2014), SWEPT (2015-2017), and CYBECO (2018). Moreover he was an evaluator for research proposals submitted to the EC in the FP5 (1999), FP7 (2012), and H2020 (2014-2016) research programmes.

Since January 2000 he leads EuroPKI, a no-profit Public-Key Infrastructure (PKI) present in several European countries to support security in networks, networked applications and electronic documents.

For the year 2001 he was nominated scientific national delegate of the Italian government at the European Commission for the Trust and Confidence area.

From September 2002 to May 2011, Prof. Lioy was President of AssoSecurity, a no-profit organization to foster the security culture in several fields of the information technology.

From September 2007 to December 2009, Prof. Lioy was a member of the PSG (Permanent Stakeholders' Group) of ENISA (the European Network and Information Security Agency of the EU).

In the year 2010 Prof. Lioy was selected as an expert for working at the ENISA "Government Cloud" project that studied possible Government applications of Cloud Computing, investigating privacy and security issues in this area. The results are documented in the public ENISA report "Security and Resilience in Governmental Clouds".

In the year 2012 Prof. Lioy was selected as an expert for working at the ENISA "Consumerization of IT" project that investigated security risks and countermeasures of the BYOD (Bring-Your-Own-Device) IT approach. The results are documented in the public ENISA report "Consumerization of IT: Risk Mitigation Strategies and Good Practices".

In the years 2014-2015 Prof. Lioy participated as technical expert to the works of the eIDAS expert group, drafting the implementing acts of the eIDAS (electronic identification and trust services) EU regulation about electronic identity, electronic signatures and trust services..

Prof. Lioy regularly acts as a reviewer for several security-related conferences and journals, such as the IEEE Transactions on Dependable and Secure Computing (TDSC), IEEE Transactions on Information Forensics and Security (TIFS), IEEE Communications Letters, Elsevier Computer Networks, and Elsevier Computers and Security.

Prof. Lioy was a Guest Editor for the 2012 Special Issue on "Security for Mobile Internet Applications" of the journal Security and Communication Networks (SCN) by John Wiley & Sons.

Publications

This section contains a selection of the publications of Prof. Lioy (most recent first):

Year 2017

- C. Basile, D.Canavese, C.Pitscheider, A.Lioy, F.Valenza, “Assessing network authorization policies via reachability analysis”, *Elsevier Computers & Electrical Engineering*, vol. 64, n. 11, November 2017, pp. 110-131
- F. Valenza, C. Basile, D. Canavese and A. Lioy, "Classification and Analysis of Communication Protection Policy Anomalies," *IEEE/ACM Transactions on Networking*, vol.25, No.5, October 2017, pp. 2601-2614
- F.Valenza, T.Su, S.Spinoso, A.Lioy, R.Sisto, M.Vallini, “A formal approach for network security policy validation”, *Journal of Wireless Mobile Networks, Ubiquitous Computing and Dependable Applications*, vol.8 n.1, January 2017, pp.79-100

Year 2016

- A.Lioy, “Harmonised security across devices”, *Research*eu results magazine*, no. 53, June 2016, pp. 40-41
- C.Basile, D.Canavese, A.Lioy, C.Pitscheider, F.Valenza, “Inter-function anomaly analysis for correct SDN/NFV deployment”, *Int. J. of Network Management*, February 2016, pp. 25-43

Year 2015

- L.Jacquin, A.Lioy, D.R.Lopez, A.L.Shaw, T.Su, “The trust problem in modern network infrastructures”, chapter in the book “*Cyber Security and Privacy*” edited by F.Cleary and M.Felici, Springer, November 2015, pp. 116-127
- D.Berbecaru, A.Lioy, “Exploiting the EU Trusted Service Status List (TSL) for certificate validation in STORK: design, implementation and lessons learnt”, *Software: Practice and Experience*, John Wiley & Sons, Volume 45, Issue 11, November 2015, pp. 1457-1477
- F.Valenza, S.Spinoso, C.Basile, R.Sisto, A.Lioy, “A Formal Model of Network Policy Analysis” *RTSI-2015: Int. Forum on Research and Technologies for Society and Industry*, Torino (Italy), 16-18 September 2015. pp. 516-522
- D.Montero, M.Yannuzzi, A.Shaw, L.Jacquin, A.Pastor, R.Serral-Gracià, A.Lioy, F.Risso, C.Basile, R.Sassu, M.Nemirovsky, F.Ciaccia, M.Georgiades, S.Charalambides, J. Kuusijärvi, F.Bosco, “Virtualized security at the network edge: a user-centric approach”, *IEEE Communications*, Vol. 53, Issue 4, April 2015, pp. 176-186
- R.Bonafiglia, F.Ciaccia, A.Lioy, M.Nemirovsky, F.Risso, T.Su, “Offloading personal security applications to a secure and trusted network node”, *Netsoft-2015: IEEE Conference on Network Softwarization*, London (UK), April 13-17, 2015, 2 pages
- C.Basile, A.Lioy, C.Pitscheider, F.Valenza, M.Vallini, “A novel approach for integrating security policy enforcement with dynamic network virtualization”, *Netsoft-2015: IEEE Conference on Network Softwarization*, London (UK), April 13-17, 2015, 5 pages
- C. Basile, A. Lioy, “Analysis of application-layer filtering policy with application to HTTP”, *IEEE/ACM Transactions on Networking*, Vol. 23, No. 1, February 2015, pp. 28-41
- C.Basile, A.Lioy, C.Pitscheider, S.Zhao, “A formal model of policy reconciliation”, *PDP-2015: EuroMicro Int. Conf. on Parallel, Distributed and network-based Processing*, Turku (Finland), March 4-6, 2015. pp. 587-594

Year 2014

- A.Lioy, A.Pastor, F.Risso, R.Sassu, A.L.Shaw, “Offloading security applications into the network”, *eChallenges 2014*, Belfast (Ireland), October 29-31, 2014, 9 pages
